- ◆ **Material Property Assessment**
 - Cement Content Analysis
 - Sulphate Content Analysis
 - Chloride Ion Concentration
 - Carbonation Depth Assessment
 - Calcium Carbonate Content

- ◆ **Cracking Assessment**
 - Crack Mapping
 - Crack Depth Measurements
 - Crack Width Measurements

Testing & Investigation Services

Infrastruct Asset Management Services Ltd. provides our Clients with a range of structural testing and investigation services focused on giving accurate and structure-specific condition assessments which will allow for cost effective repair and rehabilitation solutions to be prepared.

Our aim is to provide rapid, reliable and structure-focused testing services using the latest testing equipment and methodologies. We provide a local and nationwide service and can manage both small and large testing and investigation projects.

All inspection, testing and investigation works are carried out to relevant the British and European standards.
